

Collar Finish Pressing Machine – BRI 710/101

Overview

The BRI 710/101 is a high-precision collar finish pressing machine designed for jackets, blazers and coats. With individually closing head bucks and advanced steam/suction technology, it ensures perfect shaping of collars and lapels without shine or fabric distortion.

Key Advantages

- **Individually closing heads:** One basic buck with 3 separate head bucks for overlapping pressing and zero garment displacement.
- **Adjustable lapel head position:** Works with multiple lapel styles for maximum flexibility.
- **Separate chambers in lapel head:** Supports both short and long lapels with precision.
- **Manual pre-steaming:** Corrects imperfections from earlier pressing operations.
- **Lapel holding arm:** Assists accurate garment positioning and improves productivity.
- **Digital programmer (BRI Fashion):** User-friendly touchscreen control with automatic program management.

- **Quick program switch:** Enables instant program changes, improving workflow efficiency.
- **Mirrors for positioning:** Helps accurate alignment of the garment's back section.
- **Digital distance control (optional):** Prevents marks and shine through adjustable buck distance during pressing.
- **Collar head suction:** Removes escaped steam to protect sensitive fabrics and avoid marks.
- **Airbags (optional):** Ensure optimal positioning for various collar sizes, especially larger garments.
- **Optional steam for bust area:** Ideal for pre-steam or finishing velvet and delicate materials.

Applications

Tailoring units, garment manufacturers, uniform producers and high-end fashion finishing lines requiring flawless collar and lapel finishing.
