

Collar and Lapel Finish Pressing Machine – BRI 950 VC

Overview

The BRI 950 VC is a high-precision collar and lapel pressing machine designed for jackets, coats and sensitive tailored garments. Its VC (Vertical Closing) system ensures clear visibility, safe operation and excellent ergonomics during garment positioning.

Key Advantages

- **VC – Vertical Closing System:** Unobstructed loading area, no heat radiation to operator, clear garment visibility & integrated emergency stop.
- **Special buck design:** Optimised for perfect collar & lapel shaping on ladies' jackets and overcoats.
- **5.7" colour touch display:** Easy, intuitive machine control.
- **Individually controllable lower buck suction:** Assists accurate garment positioning.
- **Steam edge suction:** Prevents damage to previously finished areas during pressing.
- **Collar head suction + steam edge suction:** Removes escaping steam to avoid fabric shine and protect sensitive materials.
- **Contact-free distance control:** Maintenance-free system that precisely adjusts buck distance to eliminate pressure marks on any fabric.

Ideal For

Jackets, blazers, coats, uniforms, premium womenswear & menswear, tailored garments and high-value fashion items.
