# LYGOLD LG C100F Automatic Cuff Folding Workstation

High-Speed Automated Cuff Processing Solution

## Product Overview

The LYGOLD LG C100F is a fully automatic cuff folding workstation designed to streamline garment production. It integrates measurement, cutting, folding, stacking, and counting into a single system, ensuring consistent quality and high efficiency with minimal operator intervention.

Ideal for shirts, sportswear, and knitwear applications, the machine enhances productivity while reducing labor dependency and material wastage.

## Key Features

- Automatic measurement, cutting, folding, stacking, and counting
- Vertical knife cutting for clean and precise edges
- Automatic folding and flattening system for consistent finish
- Synchronous transfer system for smooth material handling
- High productivity – replaces up to 6 operators

- Stable and uniform output with minimal skill dependency
- SMC components for durability and long service life

## **Applications**

- Shirt cuff manufacturing
- Sportswear and knitwear
- Garment finishing lines
- High-volume apparel production units
