LYGOLD LG C70-U Automatic Elastic Cutting Machine

High-Speed Precision Cutting Solution

Product Overview

The LYGOLD LG C70-U is a fully automatic elastic cutting machine designed for high-speed and precise cutting operations. It integrates intelligent systems such as logo positioning, joint detection, and automatic length measurement to ensure consistent quality and minimal material wastage.

Ideal for applications in underwear, sportswear, and waistband production, the machine delivers efficient and reliable performance with minimal operator intervention.

Key Features

- High precision cutting with ± 2 mm accuracy
- Logo sensor for accurate positioning
- Automatic joint detection and cutting
- Touchscreen interface for easy operation
- Optional pen marking system
- High-speed production up to 4000 rpm
- Consistent output with reduced labor dependency

Applications

- Elastic cutting for underwear
- Sportswear and activewear production
- Waistband processing
- Garment manufacturing units
