

IIGM Pattern Paper for Manual & Automatic Pattern Cutting

High-quality paper solution for garment pattern development and automatic pattern cutting systems.

Product Overview

IIGM Pattern Paper is specially designed for garment pattern development, supporting both manual pattern making and modern automatic pattern cutting systems. It is widely used in apparel production units, CAD pattern rooms, and sampling departments where precision and consistency are critical.

Manufactured with a virgin structure and smooth surface finish, the paper ensures clean, precise cutting output and minimizes shrinkage in pattern rolls after cutting. This provides long-lasting dimensional stability and improved productivity in pattern making workflows.

Key Features & Benefits

- Suitable for manual pattern making and automatic pattern cutters
- Available in both sheet and roll formats
- Special care taken to avoid shrinkage after cutting
- Virgin paper structure for strength and smooth cutting performance
- Ensures accurate and stable garment pattern development
- Improves efficiency and reduces blade wear in automatic cutters

Technical Specifications (Typical Options)

Specification	Available Options
GSM Range	60 – 120 GSM (customizable as per requirement)
Roll Widths	900 mm / 1200 mm / 1600 mm (other widths available)
Roll Length	100 – 500 meters per roll (custom options available)
Formats	Roll form / Sheet form
Material Type	Virgin paper structure for smooth cutting
Application	Manual patterns / Automatic pattern cutters
