

IIGM Plotter Paper for CAD Pattern Printing

High-quality CAD plotting paper manufactured to strict standards for consistent GSM and smooth printing performance.

Product Overview

IIGM Plotter Paper is specially developed for garment CAD pattern printing and industrial plotter applications where accuracy, consistency, and smooth paper feed are essential. All grades are manufactured under strict quality standards to ensure uniform GSM throughout the roll, maintaining excellent print clarity and dependable performance.

The rolls are designed based on the specifications of various plotter machines, ensuring the correct balance of weight, GSM, and paper quality for uninterrupted plotting. Special care is taken to reduce core weight to ensure maximum usable paper length per roll, while providing necessary protection against transit damages.

Key Features & Benefits

- Manufactured to strict standards with consistent and uniform GSM across the roll
- Designed for compatibility with different CAD plotters
- Ensures smooth plotting performance and reliable print clarity
- Optimized roll design for maximum length and cost-effective utilization
- Reduced core weight with necessary protection against transit damage

Technical Specifications

Paper Category	Available GSM	Available Roll Widths
Bleached White	55 & 60 GSM	36", 48", 62", 64", 72", 78"
