

# IIGM Poly Film for Vacuum Auto Cutting Tables

High-strength vacuum holding film designed for accurate cutting performance on automatic cutting systems.

## Product Overview

IIGM Poly Film is an essential consumable used on automatic cutting tables to maintain vacuum suction during fabric cutting. The film ensures strong vacuum hold, preventing material shifting and improving cutting accuracy across applications ranging from apparel manufacturing to automotive seat cutting.

Manufactured to essential industry standards, IIGM Poly Film is produced with uniform gauge thickness and consistent roll width throughout, delivering dependable performance while remaining strong yet economical.

## Key Features & Benefits

- Improves vacuum retention and fabric stability during cutting
- Suitable for apparel, technical textiles, and automotive seat cutting
- Uniform gauge and consistent roll width for reliable performance
- Strong yet economical film structure for high-volume cutting rooms
- Manufactured to essential quality and durability standards

## Technical Specifications

Paper Category	Available Micron	Available Roll Widths
Virgin (HM)	20 Mic	56", 64", 80", 82", 86", 90", 92", 96", 100", 104"
