

M-FIX Electro-Mechanical Support & Suspension Systems

Product Features

- Modular kit for fast installation—no on-site welding required
- Light, Medium, and Heavy-Duty variants to match different loads
- Broad component family: pipe clamps; G/U/C/L profile supports; console-type and heavy-duty supports; industrial profile supports; modular fittings
- Pre-galvanized and hot-dip galvanized finishes; special coatings available on request
- Corrosion-resistant hardware (stem bars, bolts, nuts) tested to 400-hour salt-spray
- Design tools and engineering assistance available for layout and sizing

Product Description

M-FIX is a versatile suspension and support ecosystem for mechanical services such as cooling, heating, fire, ventilation, and sanitary lines. Its standardized components assemble quickly, adapt to layout changes, and help maintain consistent quality across the site. With multiple duty classes and durable galvanization options, M-FIX delivers long service life and reliable performance in commercial buildings, industrial plants, and infrastructure projects.

Product Specifications

System scope:	Electro-mechanical suspension/support system for HVAC, fire, plumbing, and g
Components:	Pipe clamps; profile supports (G/U/C/L); console-type supports; heavy-duty & in
Duty classes:	Light / Medium / Heavy-Duty
Materials & finishes:	Pre-galvanized steel (per TS EN 10346 / TS EN 10143) and hot-dip galvanized
Corrosion performance:	400-hour salt-spray resistance for key fasteners and fittings
Engineering support:	Design programs and expert engineering guidance available
Typical applications:	High-rise/commercial buildings, malls/hotels, hospitals, industrial facilities, petro
