

# NEXSTONE<sup>®</sup>

THE FIRST STONE WASH  
WITHOUT  
PUMICE STONE

# NEXSTONE®

THIS NEW TECHNOLOGY SAVES A  
CONSIDERABLE AMOUNT OF ENERGY COMPARED  
WITH NORMAL STONE WASH PROCESS.

We feel the responsibility for making machinery and equipment that consider the social impact saving energy, water and harmful chemicals for human health and we are in front line in order to promote sustainable solutions.

Will give the possibility to replace the use of pumice stone in the washing process with the same or better effects and results keeping advantage of saving cost, time and energy.

This new advanced technology will improve the mechanical action on the garment.

Easy installation and use of the device inside the machine in order to obtain a multi-functional use.

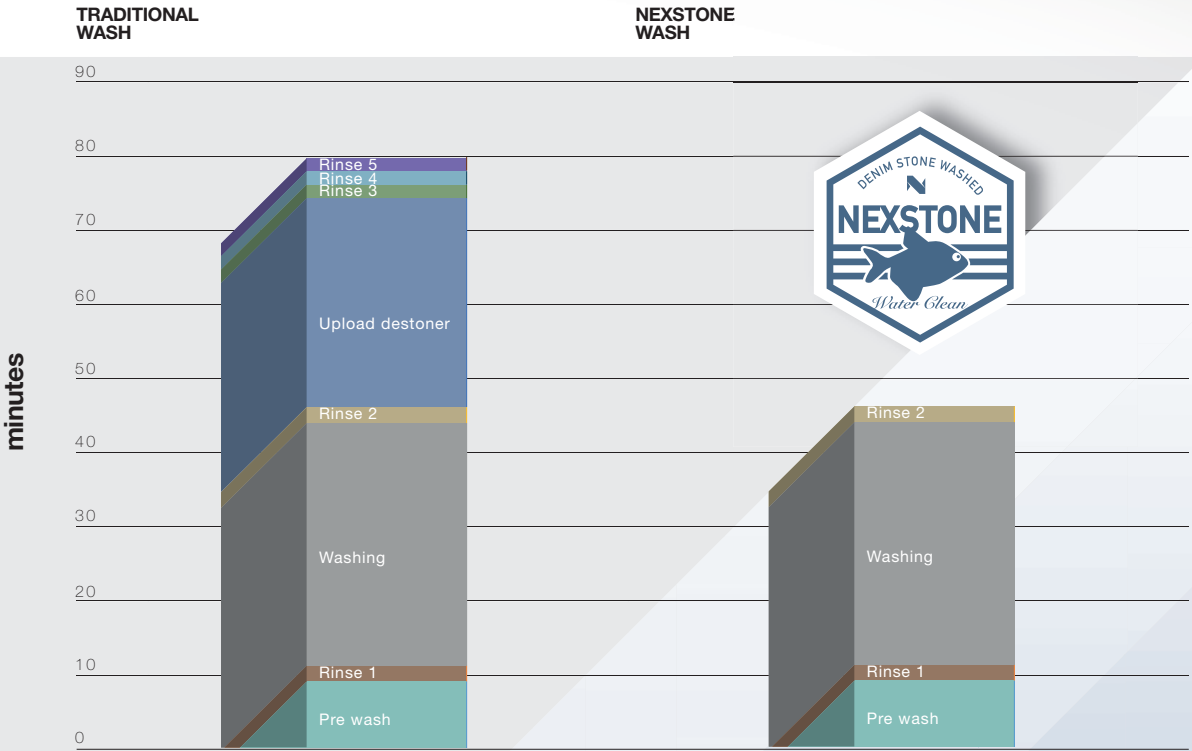

Washing with stones in classic way means, costs of product, of water treatment, of energy, of deterioration of washing machine and it means not a costant result of every load.

DENIM TREATED WITH  
NEXTONE

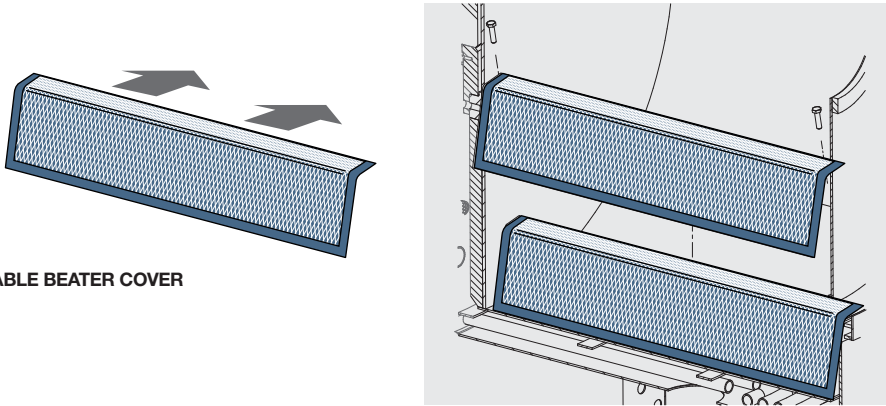

# SAVE COST, TIME AND ENERGY.

## AMOUNT OF PUMICE STONE IN STONE WASHING PROCESS

REMOVABLE BEATER COVER

Great advantages, compared to the old pumice stone washing **not required unloading of stones** at the end of the cycle and any additional washing or rinsing to clean the residual of the pomice stone on the garment and on the water after the treatment.
