

Prespotting Cabin 7406

Ergonomic, clean, and efficient pre-spotting station with powerful extraction and integrated lighting to prepare garments for professional finishing.

Key Features

- Large aluminium hood with strong, permanent suction for a clean working area.
- Integrated spotting agent shelf/deposit and bright lighting for excellent visibility.
- Perforated stainless steel work surface with spill tray for liquids.
- Spray pistol for air and liquids supplied as standard.

Options & Versions

- Swivelling spotting unit with suction and liquid discharge.
- Compact model with 900 mm working width for space-constrained shops.

The VEIT 7406 simplifies pretreatment and stain removal, improving quality and throughput before washing or finishing steps.
