

WS-9112

AUTOMATIC HEM SEWING MACHINE FOR SUIT PANTS

Weishi WS-9112 is an efficient automatic sewing machine for sewing the left/right top flies, automatic hem and pocket facings of suit pants. This multi-function machine is easy and flexible to operate, being extensively used in suit pants production lines.

High-efficient working performance

- Highly automatic, intelligentized, user-friendly, easy-to-operate, stable and reliable.
- The accurate feeding control by its servo motor can rapidly and efficiently complete multiple sewing procedures, reducing the occurrence rate of artificial poor stitches and the labor intensity of operator.
- Applicable to sew suit pants in various fabrics, resulting in ideal sewing effects.
- Rapidly adjust the outseam width and realize accurate automatic hem cutting.
- Automatically control the start/end points of stitching through exact scanning with electronic sensor and measurement arrangement of stitching length.
- Sew various pocket facings (including vertical pocket and slant pocket) for suit pants, realizing automatic hemming and stitching.
- The system realizes initial and final back stitching or dense stitching, and the stitch length and quantity within effective range may be arbitrarily set.
- Equipped with completely-overlapped working mode and full-automatic material collection, improving the production efficiency.

MAIN SPECIFICATION

Maximum sewing speed	3000 stitches/min
Maximum stitching length/mm	450
Maximum hem length/mm	350
Left/right top flies	1000 suit pants/480min
Left/right top flies and 4 pocket facings	350 suit pants/480min
Hem and stitched pocket facing	3800 pocket facings/480min
Rated voltage/V	220
Working air pressure/Mpa	0.5
Dimension/mm	1650L×1250W×1600H
Weight/Kg	260

Novel and unique equipment

- Automatic hem and stitch with two procedures combined, making it rapid and efficient.
- Equipped with completely-overlapped working mode, full-automatic material collection, improving the production efficiency.
- 7-inch touch screen displaying in Chinese language: easy operation, PLC control, stable operation and accurate location.
- Real-time automatic monitoring guarantees the sewing precision.
